

ACCEPTABLE

Lid and Booklet removed and adequately sliced

NON ACCEPTABLE

Inadequate slice and lid is still on container

NON ACCEPTABLE

Lid and Booklet still on bottle and not sliced

NON ACCEPTABLE

Booklet still attached and not sliced

NON ACCEPTABLE

Not a Chemical container

NON ACCEPTABLE

Lid on bottle and not sliced

As you bring your chemical bottles in we will sample at least 5 bottles randomly from your load we will be looking for the following:

1. Booklets that are attached to the bottle (must be removed)
2. Any Chemical residue (there cannot be any)
3. Must be properly cut and washed out with the lid removed

If we find a problem, we will reject the entire load, and here is why-

1. The State of Idaho comes to our landfill twice yearly to recycle the chemical bottles and they are very particular as to how our chemical bottles and containment area are handled.
2. The threat to our landfill is, hazardous chemicals may leach into the subsurface water table with the resulting liability becoming very costly.

Thank you for the great job that you do!!!
